

HELP FOR YOUR NEXT HEALTHCARE PROVIDER VISIT

Thinking about

15 - YOUNG ADULT

Good Health

The healthcare provider you'll see today will check several areas. This includes your height, weight, blood pressure, and taking a look at your eyes, ears, nose, and throat. He or she will also examine your chest, back, stomach, and arms and legs. They may ask some questions below about other things, including diet and exercise, safety, substance use, and how you're feeling emotionally and in your relationships. It all adds up to give a good picture of your overall health, both mentally and physically.

Speak up! This exam is all about you. If you don't understand something they tell you or are doing, ask them to explain. Any question you ask is a good one!

Taking care of you is your healthcare team's most important job! To get ready for your visit, the information on this sheet will let you know what to expect when you're with the doctor or nurse. There are also some questions, and these are meant to help you think about how you're feeling physically and mentally, and to highlight any areas you might want to talk about. You don't have to bring this sheet to your visit (unless you think it's helpful). Anything discussed during your visit is private and isn't shared unless your doctor or nurse is worried about you or someone else.

Questions

Do you have any questions or concerns you need to share with your healthcare provider (for example, your period)?

Anything hurt or feel bad?

Straight Gay Lesbian Transgender Queer

Are you attracted to:
Males Females Both

Your life. Your health. Your responsibility.
Your health is your power.

Vaccines are an important way to protect your health. Your doctor will recommend a shot for you depending on your age, your health condition, and the shots you've already had. Some of the shots you might be familiar with such as shots for the flu, tetanus, polio, measles, mumps, and chickenpox. Other shots you may talk about today include Human Papillomavirus (HPV), a shot recommended to prevent cancer for all girls and boys your age. Ask your doctor or nurse if you have questions.

Shots You Need
