Tales of a Rural School-Based Telehealth Program:

Behavioral Telehealth Edition

Rural/School-Based Health Care Conference
July 27, 2024

1

weitzman institute inspiring primary care innovation

CME and CE Information

In support of improving patient care, this activity has been planned and implemented by School-Based Health Alliance and Moses/Weitzman Health System, Inc. and its Weitzman Institute and is jointly accredited by the Accreditation Council for Continuing Medical Education (ACCME), the Accreditation Council for Pharmacy Education (ACPE), and the American Nurses Credentialing Center (ANCC), to provide continuing education for the healthcare team.

Through Joint Accreditation, credits are also available under the following bodies:

- American Academy of PAs (AAPA)
- American Dental Association's Continuing Education Recognition Program (ADA CERP)
- American Psychological Association (APA)
- Association of Social Work Boards (ASWB)
- Commission on Dietetic Registration (CDR)

The Weitzman Institute was founded by Community Health Center, Inc. and is part of the MOSES/WEITZMAN Health System. www.mosesweitzman.org

Acknowledgment and Disclaimer

The *Healthier Lives at School and Beyond Telemedicine Program* was previously supported by the Health Resources and Services Administration (HRSA) of the U.S. Department of Health and Human Services (HHS) Office for Advancement of Telehealth, Telehealth Network Grant Program (TNGP).

Currently, program operations are funded through a combination of private and public funding sources – Anonymous Trust, The H. Bate Foundation, ECU Health Foundation, and the NCDHHS Office of Rural Health. The contents of this presentation are those of the presenters and do not necessarily represent the official views of, nor an endorsement by, HRSA, HHS, NCDHHS, the U.S. government, nor Anonymous Trust, ECU Health Foundation or The H. Bate Foundation.

ANONYMOUS TRUST

6

Objectives

- Provide **Introduction and overview of the Healthier Lives at School & Beyond** school-based telehealth program, including the **behavioral telehealth** service line
 - Care Design & Operations
 - Referral Identification and Pathways
- Provide introduction to **three unique modalities of care delivery and evidence-based treatment approaches** utilizing **case vignettes**
 - Virtual In-School Services (teletherapy)
 - Virtual At-Home Services (teletherapy)
 - On-Site Behavioral Health Consults (bus trips)
- Identify and discuss **successes and challenges** associated with school-based behavioral telehealth services

ECU School of Medicine

7

Audience Roll Call!

8

Who We Are: Our Origins

9

Identified Need

- Geographic Area Selection:** Rural health focus with a mission to reduce health disparities of medically underserved and disadvantaged communities across ENC
- Target Population:** School-aged youth, school staff/faculty, family units
 - Children with a treatable MH disorder who did not receive treatment (Kilmer & Kiser, 2020)
 - National prevalence – 49.4%
 - NC prevalence – 72.2%
 - Limited access to school and community health resources (nc.ohw.2022)
 - NC School Nurse Ratio – 1:1,007
 - NC School Counselor Ratio – 1:316
 - Past yr MDD among 12-17 y/o in NC – 15.5% (2017-2019)
 - NC Mental Health Providers – 490:1 (2019, 320:1 (2019)
 - NC Primary Care Physicians – 1,410:1

94 of 100 counties in NC are mental health provider shortage areas

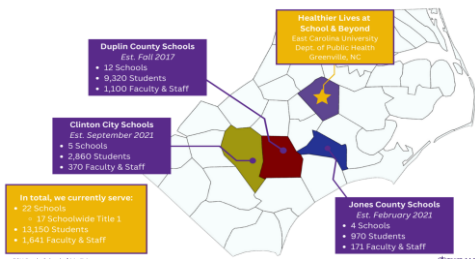

Source: A. B. K. & M. S. (2019). Mental Health Provider Shortage Areas in North Carolina. *Journal of Community Health*, 44(1), 1-10. <https://doi.org/10.1007/s10995-018-2625-2>

Timeline of Program Evolution

Today's School-Based Telehealth Footprint

Rural Landscape – Duplin County, NC

Total Population – 49,520; Child Population – 16,357

- Quality of Life & Health Factors**
 - Per of farmland – 20%
 - Frequent Mental Distress – 17%
 - Diabetes Prevalence – 13%
 - Physical inactivity – 30%
- Outcomes**
 - ACHS – 4.0 (2.0)
 - Mental Health Providers – 1,260:1
 - Students – 1,000:1
 - Uninsured children – 11.6% (2019) (Uninsured adults – 14%)
- Health Resources**
 - Median Household Income – \$11,000
 - Children in Food Insecure Homes – 14.0%
 - Children in Racially Insecure Homes – 12.2%
 - Children in Single-Payer Insecure Homes – 12%
 - Children Assessed for Abuse or Neglect (per 1,000) – 57.0%
 - Disruptive Health – 18%
 - Children eligible for Free/Reduced Lunch – 90%
- Educational Outcomes**
 - 2+ year college completion rate – 17%
 - High school graduation rate – 85%
 - Residents who take the driver's exam or higher – 15.6%

State's largest hog producer and #2 in agriculture

Who We Are: Our Services

15

Program Overview

www.healthforvets.ecu.edu

- **School-Based Telehealth Program designed to:**
 - Remove barriers to quality care access
 - Help reduce, or prevent, the effects of chronic disease
 - Decrease time missed in the classroom or at work
 - Reduce unnecessary emergency department visits
 - Increase access to worksite wellness services for staff
 - Improve educational outcomes
 - Provide a team-based care approach, offering:
 - Acute Medical
 - Nutrition Counseling
 - Behavioral Health

ECU Brody School of Medicine

16

The How: Key Players & Operations Breakdown

<p>Administration & Management Team Oversees and manages day to day operations (research, education, and administrative tasks)</p> <p>Program Management Program Director Primary Investigator Medical Director</p> <p>Research Associate & Intern Coordinates data collection, analysis, compliance and reporting. Aids in construction of operational procedures and guidelines.</p> <p>Administrative Support Staff Leads the administrative arm of service delivery, including scheduling coordination, template design, workload management.</p>	<p>Clinical Team Coordinate care delivery, provide direct care and oversee student supervision (PA)</p> <p>Acute Medical Services Address minor medical needs (ears, throat, stomach ache, rash, etc.) Providers based at ECUH & Center for Rural Health Innovation in rural areas.</p> <p>Nutrition Counseling Address client concerns of care (weight management, healthy eating, medical nutrition therapy) Providers are registered dietitians and based at ECUH.</p> <p>Behavioral Telehealth (BH) Address emotional health needs, particularly those impacting performance/functioning in the school environment. Providers are licensed APR professionals and direct care.</p>	<p>School Team Key players at implementing system (network, communication)</p> <p>School Nurse Primarily identifies and refers acute medical and nutritional issues. Trained in tele-pressing students for each service.</p> <p>School Social Worker/ School Counselor Primarily identifies and refers BSA cases. Trained in tele-pressing students for BH and nutrition services.</p> <p>Telehealth Logistics Coordinators Provide on demand on-site school support ("Boots on the ground"). Aid in connecting outreach, bridge to BH schools and TIT team, and serve as secondary acute provider (PA).</p>
---	---	--

ECU Brody School of Medicine

17

18

Behavioral Telehealth Objectives

- **Improve access to care and provide early identification and intervention** for common pediatric mental health disorders
- **Provide high quality, evidence-based services** to students, faculty and staff
- **Support strategic goals of Public School Units (PSU)** (enriching mindsets and supporting the whole child) by embedding services directly into school

ECU Brody School of Medicine

ECU HEALTH

19

19

The How: Identification & Referral Pathway

ECU Brody School of Medicine

ECU HEALTH

20

20

Common Referral Sources

ECU Brody School of Medicine

ECU HEALTH

21

21

Referral Options

- **Step 1: Speak with parents/legal guardians**
 - Obtaining caregiver consent to submit a referral is required
 - Explain reason for referral/answer questions/achieve consensus
 - Address care barriers/concerns
 - Respect aspects of family's culture, beliefs and values
- **Step 2: Aid parent/legal guardian in completing formal referral paperwork**
- **Step 3: Submit forms via HIPAA compliant electronic or hardcopy submission**
 - <https://redcap.ecu.edu/surveys/?s=IA3Y3P9Y7E>
- **Staff Referrals: Follow the same process.**
 - All referrals are safe and confidential

ECU Brody School of Medicine

ECU HEALTH

22

22

Common Referral Reasons

- ADHD
- Adjustment Difficulties
 - e.g., big life changes, school/classroom adjustment, family changes/displacement
- Terminal illness or significant health-related changes
- Feeling down or depressed
- Emotional Dysregulation
 - e.g., frequent crying, aggression towards others, outbursts
- Grief or loss of a loved one
- Stress Management
- Sleep Dysregulation
 - e.g., oversleeping, trouble falling asleep, nightmares, etc.
- Little interest in doing things or withdrawal from friends
- Anxiety
 - e.g., social, generalized, separation, school avoidance, academic/performance based symptoms
- Self-soothing and regulation skills for trauma symptoms
- Behavioral Management Skills

23

The Impact (2022-2023 SY)

1285 Total Encounters

- 361 Acute**
 - 83.4% of encounters could return to work/class same-day
- 694 Behavioral Health**
 - Jones County had a 310% increase in appointments from previous year
- 200 Nutrition**
 - Duplin County had a 42% increase in appointments from previous year
- 30 Bus Physicals**

ECU Brody School of Medicine

24

Service Breakdown: 2022-2023 SY

Nutrition Counseling & Education

- 28 total patients
 - 14% of patients are staff
 - 16 projected to restart services in Fall 2023

Behavioral Health

- 115 total patients
 - 59 patients from Duplin Co.
 - 24 patients from Jones Co.
 - 32 patients from Clinton
 - 97% of patients are students
 - 42 projected to restart services in Fall 2023

ECU Brody School of Medicine

25

- 4,293** completed telehealth encounters
- >350,000** miles of patient travel saved
- 652,570** minutes of instructional time saved for students
- 91%** return-to-class rate for acute medical patients

Telehealth Service Line Usage

Behavioral Health: 49%, Acute Medical: 26%, Nutrition: 25%

Telehealth Usage Over Program Lifetime

Bar chart showing usage from 2017-2018 to July 2023. Total usage reaches 1,285 encounters by July 2023.

26

ECU HEALTH | ECU

Behavioral Telehealth Care Delivery

Examples of diversification and adaptation of service delivery to meet evolving rural health needs

27

Behavioral Telehealth Service Overview

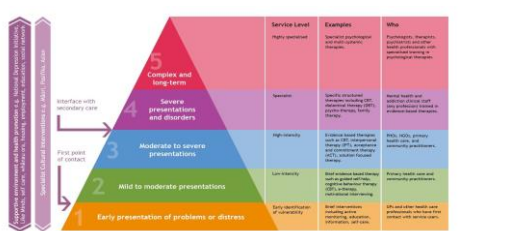

Clinical Care

- Provision of behavioral assessments and therapeutic interventions utilizing a brief, short-term virtual care model
- Supported by evidence-based, empirically validated theoretical models
 - Brief Cognitive Behavioral Therapy (B-CBT)
 - Solution Focused Brief Therapy (SBFT)
 - Person-Centered Therapy
 - Problem Solving Therapy
 - Family Systems Theories
 - Biopsychosocial-Spiritual Framework (BPSS)
- Coordinated treatment planning
- Referred patients receive an average of 6-12 teletherapy sessions
 - Aligns with short-term care model, increases access to care, and improves wait times

ECU Brody School of Medicine

28

Service Level	Examples	Who
Highly specialized	Severe and long-term mental health conditions, complex and long-term conditions	Psychiatrists, Psychologists, psychiatric nurses, nurse practitioners, clinical social workers, and other behavioral health professionals
High intensity	Severe and long-term mental health conditions, complex and long-term conditions, acute care, crisis intervention, and other behavioral health services	PhDs, MSWs, primary care physicians, nurse practitioners, and other behavioral health professionals
Low to moderate intensity	Mild to moderate mental health conditions, acute care, crisis intervention, and other behavioral health services	Primary care physicians and other behavioral health professionals
High availability of availability	Early presentation of problems or distress, acute care, crisis intervention, and other behavioral health services	Primary care physicians and other behavioral health professionals

ECU Brody School of Medicine

29

Behavioral Telehealth Provider Overview

Providers

- Providers specialize in integrated approaches to healthcare, including an emphasis on biopsychosocial-spiritual or whole-person care
- Two (2) licensed mental health providers
- Three to five (3-5) master's and doctoral level graduate interns per year
 - School Psychology (PhD), health Psychology (PhD), Clinical Counseling (MEd), Counseling Education (MS), Marriage and Family Therapy (MS)
- Clinical supervisors are trained in the primary care behavioral health (PCBH) model with background in medical family therapy and clinical mental health counseling
 - Learner-Centered Education Model
 - Person-of-the-Therapist Training Model (Spotts & Kiser, 2018)

ECU Brody School of Medicine

30

Our Behavioral Health Team (23-24 SY)

Erika Taylor, MS, LMFT, BCITM
Behavioral Health Clinical Supervisor & Consultant

Enfrith A. Afrlye, MS, LCMHCA, NCC, LCASA
Behavioral Health Specialist & Clinical Supervisor

Kallie Rose Maloney
Doctoral Student, Clinical Health Psychology

Emily Jansen
Doctoral Student, Clinical Health Psychology

Jenna Amato
Masters Student, Counselor Education

31

In-School Service Delivery

32

In-School Service In Action

ECU Brody School of Medicine

ECU HEALTH 33

33

On-Site Resources

- Treasure chests
- Feelings Jenga and Feelings Ball
- Mad Dragon card game
- Animal finger puppets
- Discussion cards
- Sensory tools – pop its, tactile breathing stickers
- Online tools – electronic color wheel, emotions bingo, chess, fillable PDF, YouTube videos, electronic white board, screen share, screening tools

ECU Brody School of Medicine

ECU HEALTH

34

At-Home Service Delivery

35

Overview

- Mainly provided in extenuating circumstances or during summer months
- Families and patients must agree to:
 - Safe, secure and private location to complete visits
 - Comfortably facilitate connection and re-connection when necessary
 - If a minor, have a supervising adult available for full duration of visit
 - Reliable, private wifi or broadband connection
 - Access to a reliable connectivity device (smartphone, laptop, desktop)
- **Our team works to problem-solve potential barriers**

ECU Brody School of Medicine

ECU HEALTH 36

36

Case Scenario

- **Demographics:**
 - 14 yr. Old, Caucasian male
- **Referring Party/How Referral was Identified:**
 - School Counselor
 - Concerns related to homebound schooling → district facing possible ramifications
- **Referral Reason(s):**
 - Social anxiety causing severe functional impairment
 - Homebound 2+ yrs. d/f: fears of public spaces (suspected agoraphobia)
- **Risk Factors @ Time of Referral:**
 - Academic performance concerns
 - Inability to promote to next grade level
 - Comorbid physical health concerns/complexity

Based on your role and respective SBH site, how might you and your team approach this type of referral? Challenges?

ECU Brody School of Medicine

ECU HEALTH 37

37

BPSS Assessment & Conceptualization

ECU Brody School of Medicine

38

Within our care model (it's not school)?
 What do we have to offer?
 Higher level of care?
 Within our Scope?
 What are our ethical responsibilities?
 What barriers might we face?

What We Did

Educated and Prepared (before first visit)

Services

- Parent: Conducted telephonic outreach with parent to overview services and reasons for referral, outlined care model and confidentiality, reviewed scope of practice/care, discussed post-session communications, verified consent for service, addressed questions/concerns, gathered intake information
- Teacher & School Counselor: Conducted telephonic outreach to review social history prior to becoming homebound, reviewed current educational needs/goals, reviewed confidentiality limitations, previously attempted interventions

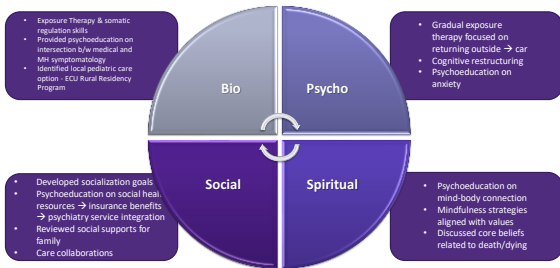

Technology

- Identified tele-presenter and provided tech education, reviewed disconnection and remote emergency plan
 - Primary Tele-Presenter – Homebound Teacher
 - Secondary/Backup Tele-Presenter – Patient w/mom as aid
- Scheduled a "tech check" meeting

Scheduling

- Aligned appointments with in-home teacher's schedule (end of class time)
- Bundle scheduled (with input from teacher and parent) to enhance follow-up rate, accommodate varying schedules, aid patient in preparing for visits (enhancing structure and organization)

What We Did: Utilized BPSS Framework to Inform Care

Case Scenario

Intended Outcomes (Treatment Goals):

- Provide psychoeducation on anxiety and panic, focusing on the connection between physical symptoms (such as blood sugar concerns) and anxiety.
- Teach and practice relaxation techniques (e.g., deep breathing, progressive muscle relaxation, mindfulness) to manage acute anxiety.
- Gradually introduce exposure therapy to help the patient confront and reduce avoidance behaviors, such as refusal to leave home or be outdoors.

of Completed Sessions:

- Completed a total of 10 sessions.

Referral Recommendations:

- Primary Care Physician (PCP) for a health assessment, monitoring blood sugar levels, managing physical health concerns, and ruling out any medical conditions contributing to anxiety. Additionally, consult a dietitian or nutritionist for dietary guidance to stabilize blood sugar, improve overall health, and support anxiety management. A psychiatrist should evaluate the need for medication to treat anxiety and panic symptoms and manage any prescribed medications for effectiveness and side effects.

Case Scenario

- o Treatment Progress:
 - o Successfully spent 5 minutes outside on the porch, an improvement from previously being unable to sit on the porch during sessions.
 - o Identified and communicated when their mind and body were initiating a fear response, indicating increased self-awareness.
 - o Utilized and collaborated with ECU Brody School of Medicine Rural Residency Program to help familiarize the patient with various components of the medical environment.
 - o Family successfully regulated their own anxious dysregulation and need to aid the patient when in distress, enhancing the patient's independence.
 - o Patient was unable to get into a car to go to the office but showed increased comfort with the idea of interacting with a medical provider and understanding what to expect.
 - o Provided referral information to the patient's parents for follow-up with a doctor who assisted with familiarization to coordinate in-person care in the future.

ECU Brody School of Medicine

43

On-Site Consultations

Interdisciplinary Care Provision via Bus Trips

44

The Need

- o Immunizations and health assessments required within 30 days of starting school or childcare
- o COVID-19 limited pediatricians' ability to schedule health assessments, particularly in rural communities
- o Over 200 students facing out-of-school suspension

ECU Brody School of Medicine

45

The Answer

ECU Brody School of Medicine

Replicating the integrated care model...on a bus!

46

Adolescent Wellbeing Framework

Source: <https://www.who.int/publications/m/item/adolescent-well-being>
World Health Organization (WHO) Partnership for Maternal, Newborn & Child Health (PMNCH)

Innovative Interdisciplinary Care Approach – Bus Trips

Team Members	Team Roles
Registered Dietitians	Provide on-demand nutrition counseling/education; refer for care PRN
Pediatrics – residents, medical students, attendings	Provide full health assessment and ultra brief depression/anxiety screening (PHQ-4)
Behavioral Health – clinical interns, licensed provider/supervisor	Provide on-demand behavioral health consultation based on screening results; refer for care PRN
Nursing – school nurse, nursing students	Identify students, coordinate bus arrivals, and obtain pre-assessment vitals
School Support Staff & Administration	Assist in student identification, day-of coordination, communicate w/families
Public Health – intern, research associate	Assist with day-of logistics, book distribution, community health related needs and data collection

ECU Brody School of Medicine

Workflow

ECU Brody School of Medicine

Our Team in Action

ECU Brody School of Medicine

ECU HEALTH

51

51

Outcome Data

Total Bus Trips (YTD): 18

Total Students Served: 22 (first trip); 303 YTD

Total Students Referred to BH (same day): 10

ECU Brody School of Medicine

ECU HEALTH

52

52

Strengths & Limitations

53

Strengths

- **Strong partnerships across communities** – ECU services are embedded in pre-existing community supports
 - FM Rural Residency Program rotation site
 - ECU Health Duplin Hospital – partnered on separate grant project with HL team member
 - ECU Health outpatient clinics
- **Every school in Duplin County has a dedicated school nurse**
 - Over 50% of school nurses in NC split their time between two or more schools
 - Bridging the gap with TLCs in other counties
- **Service setting and delivery modality:**
 - Convenient, de-stigmatizes, reduces care and transportation burden, takes place in safe environment, can be discrete, reduces traditional access barriers, reduces care fragmentation, enhances coordinated care, whole child/family centered
- **Training Hub** – creating rural health professional pipeline

ECU Brody School of Medicine

ECU HEALTH

54

54

Limitations

- Service modality **requires advanced training** and education (provider), **technology proficiency** (provider & patient)
- Contraindicated for some** conditions and populations – not a universal fit
- Connectivity and broadband challenges** (digital divide)
- Remote services** create barriers to including entire family
- Advanced time and energy investment** from entire care system to provide effective, fluid, quality services (remote vs. in-person workflows)
- Scheduling** – finding time in school day
- Provider shortages** – few providers, none full-time
- Time-Bound** d/t funding

ECU Brody School of Medicine

ECU HEALTH

55

55

Implications & Lessons Learned

Functional equipment matters

Switched from complex to portable user-friendly technology

Boots on the ground are critical

Ensuring on-site partners are well trained, well valued and well heard/served: TICs
Bus trips and site visits made by providers (Fall/Spring)

Build continuous feedback loops

Annual surveying and quarterly check-ins (at minimum) with cross-sector stakeholders, including schools
Various aspects of program delivery and design have been revised/refined based on direct feedback from schools

First Order Change

Services may not fully resolve initial issues warranting service referrals, yet have the capacity to create behavioral and systemic changes that can inform long-term improvements ("planting seeds")

ECU Brody School of Medicine

ECU HEALTH

56

56

"The benefits to us are immeasurable. It [telehealth program] has provided things for our students that we wouldn't have had. And we know, as educators, for kids who get good health care and are healthy, there are going to be academic benefits down the road."

Dr. Ben Thigpen, former Duplin County Assistant Superintendent

57

57

"You just overcome all those barriers in one fell swoop. And when I have a child who needs something, I know I can get the child to services. Every person that I have sent to a nutritionist or behavioral health specialist [via telemedicine] has been a success story. Their lives have been touched and changed by it, and they have been made healthier by it. And having children who are physically healthy, mentally healthy and nutritionally healthy creates stronger communities."

Dr. Mary Gaylord, former Duplin & Sampson County Pediatrician

58

58

"According to my son, it was awesome. He doesn't have anybody, so technology is his friend. And speaking to someone through a computer screen, for him, was like being on a spaceship. He really enjoyed it. He's speaking with Erika and she gives him suggestions and pointers, and he comes home and practices it. I think it's a great program, especially when the child comes back and talks to the parent. That's what I like about it, because you can see the difference in the child."

Jovan & Jahmie Wilson, Student and Parent
